

Strategic Insurance with Infolns

In today's highly competitive and dynamically evolving insurance market segment, it is important to gain a competitive advantage by using innovative new technologies in order to serve customers more effectively and efficiently.

Infolns is a state of the art, end-to-end solution to automate and integrate all functions of your General Insurance, and is a tried, tested and proven "**Total Solutions Package**". It is an integrated client driven insurance system encompassing the full policy lifecycle from Quotation, Underwriting, Receipting, through to Re-insurance, Claims, Sales & Marketing, Unearned Premium Reserve, and Commissioning. Infolns is a proven high performance solution that has evolved through continual dialogue with clients and by addressing the specific demands of the evolving insurance and technology markets.

Infolns is developed by **Informatics International Limited (IIL)**, a Sri Lankan company which is an ISO 9001:2000, CMMI Level 3 Certified Software Developer of international repute, providing Innovative Systems Solutions, Quality Customized Software and Reliable Support Services.

Benefits of using Infolns

- End-to-end integration with all the General Insurance modules
- Innovative product build which has the ability to create all products in all General Insurance classes
- Claims event tracking upto the last event date
- All functions of receipting transactions embedded into Infolns
- Able to perform combined and shared banking functionality in receipting
- A 3 tier architecture product which has a very user friendly, innovative presentation layer backed by all the features of the Oracle Database

Informatics International Limited is a long standing partner of **State Informatics Limited (SIL)**. IIL and SIL have implemented projects in Mauritius such as Insurance Solutions and Solutions for the Passport & Immigration Office.
