

# Transforming the Industry

## The New Sun Solutions Portfolio

### Oracle Sun Servers

Oracle Sun Servers embody more than 20 years of systems expertise and innovative thinking. Designed with your business in mind, Oracle Sun Servers provide the performance, scalability, energy efficiency, and cost effectiveness to help you meet your business needs.

When you build your datacenter on a solid foundation of Oracle Sun Servers, you can expect maximum ROI and minimum TCO. Sun provides a comprehensive line of systems that can help you meet any business requirements, now and in the future.

Oracle Sun SPARC & Ultra SPARC Enterprise Servers offer the highest efficiency in power and cooling, the highest reliability, availability and serviceability, the broadest offerings in virtualization and consolidation, unmatched investment protection, seamless scalability, and best-in-class price / performance.

Also, Oracle Sun Blade Modular Systems, the industry's most flexible and capable blades, are designed to integrate easily into your existing datacenter infrastructure, giving you the agility and performance you need to stay competitive.

These Sun SPARC Enterprise systems running on the Oracle Solaris OS give you an extremely wide range of choices to deploy the right combination of power and scalability for growing enterprises.

### Oracle Sun Storage

To succeed in today's open and ultra-competitive marketplace, you need an agile, secure IT environment that enables you to quickly, efficiently, and securely respond to business opportunities. Oracle Sun storage solutions are built on open standards to work with your existing infrastructure, and will help your company increase data's role as a strategic asset.

Oracle Sun Open Storage combines open source software with industry-standard hardware, enabling you to reduce your reliance on high-priced systems and save up to 70 percent on storage costs.

Unified Storage systems offer new innovations in storage, including enterprise-class data services, massive scale, and superior performance while delivering significant cost savings. These systems feature a common, easy-to-use management interface that requires no additional training, and have the industry's most comprehensive analytics environment to help isolate and resolve issues to minimize impact to your business.

### Oracle Sun Database Machine (Exadata V2)

Oracle Exadata Storage Servers combine Oracle's smart storage software and Oracle's industry-standard Sun hardware to deliver the industry's highest database storage performance. The combination of these technologies has produced the Oracle Sun Database Machine (Exadata V2) which is the world's fastest for any type of database workload, and the only database machine that runs transaction processing applications. It is a complete package of software, servers, storage and networking for all data management, including data warehousing, transaction processing and consolidated mixed application workloads. With the Oracle Sun Database Machine, customers can consolidate all their database applications, store up to ten times more data, search data up to ten times faster, and make faster business decisions in real time without making changes to applications.

### Oracle (Sun) & State Informatics Limited

Oracle is the world leader in database solutions. Sun is the thought leader and the platform of choice for mission-critical computing. Together, Oracle and Sun provide a comprehensive and collaborative alliance, each running a substantial portion of their business operations on each other's products.

State Informatics Limited (SIL) has been a partner of Oracle for 20 years and a SUN Microsystems partner for over 15 years. SIL is also a SUN Executive Level Partner with the largest SUN installed server base in Mauritius. SIL has implemented high end solutions including clustered systems using SUN Microsystems technology in the Financial, Telco, Utilities, Logistics and Public sectors. Together with SUN, SIL can propose very cost effective solutions and help customers benefit from Open Systems Architecture which will lower your total cost of ownership. SIL has also a pool of Oracle SUN certified engineers to deliver a high level of service to its local and regional clients.

### Our Offerings

State Informatics Limited (SIL) and Oracle Sun can provide the following to your organisation:

- ▷ **IT Infrastructure Consolidation**
- ▷ **Virtualization (Desktop, Server & Storage)**
- ▷ **Disaster Recovery**
  - ▷ *Off site, Cold, Warm & Hot, Backup/Restore, Hosting and DRP*
- ▷ **Outsourcing of your IT services**
  - ▷ *Facility Management*
  - ▷ *System Administration and Management*
  - ▷ *Digitizing and Archiving Solution including Data Capture*
- ▷ **Consultancy**
  - ▷ *Infrastructure Review and Design*
  - ▷ *Proof of Concept*
  - ▷ *Migration of Platforms*
- ▷ **Business Turnkey Solutions**
- ▷ **Training**
- ▷ **Support and Maintenance Services**
